

Unit 14: ES2015

Here are some commonly used terms you will find in the upcoming unit. Feel free to refer to this glossary whenever things get confusing!

Term	Definition
ES2015	ES2015 is the most recent version of JavaScript that introduced significant changes and upgrades to it's features.
Destructuring	Destructuring in JavaScript is a convenient way of extracting multiple values from data stored in (possibly nested) objects and Arrays.
Map	Map is a new data structure introduced in ES2015. Map is similar to objects in JavaScript that allows us to store elements in a key/value pair. The elements in a Map are inserted in an insertion order. However, unlike an object, a map can contain objects, functions and other data types as keys.
Set	A JavaScript Set is a collection of unique values. Each value can only occur once in a set and it can hold any value of any data type.
